LOW-WASTE HOME

Household Budget & Refill Tracker

Track refill unit prices, utility bills and repair decisions in one simple workbook.

Printable quick-start guide and worked example (the spreadsheet is built separately in Google Sheets)

7 pages including cover
Digital download. Quick-start PDF; spreadsheet link follows in the listing.

QUICK START

Set up your tracker

1. Open the Sheets copy from your link (make your own copy).
2. Enter your currency and the month.
3. Add your categories on the Settings tab.
4. Log five transactions to test it.
5. Review the Dashboard.

Estimated savings are shown as assumptions. Recorded spending is shown separately.

TABS

What each tab does

Tab	What you enter	What it tells you

REFILL MATHS

Unit price

Unit price = pack price ÷ quantity in a comparable unit (e.g. price per 100 ml).

COMPLETED EXAMPLE

Worked example

Concentrate: £6.00 for 1 litre = 0.6p per ml. Ready-to-use: £3.50 for 750 ml = 0.47p per ml. The ready-to-use is cheaper per ml here.

REPAIRS

Repair or replace?

Item	Repair cost	Replacement cost	Expected extra use	Decision

REUSABLES

Break-even check

Break-even uses = upfront reusable cost ÷ (disposable cost per use − reusable running cost per use).

COMPLETED EXAMPLE

Worked example

Reusable bottle £12. Disposable £1.20 per use. Reusable running cost 10p per use. Break-even = 12 ÷ (1.20 − 0.10) = 11 uses.

If the disposable cost per use is lower than the reusable running cost, the result is "no break-even under these assumptions".

MONTHLY REVIEW

Monthly review

What changed this month?
